## Brain–environment synchrony and the auditory perception problem: Behavioral studies

### Research Participant Consent Form

I have received written information about the study and the procedure of the study. I have read and understood all of the information completely. If I had questions concerning the upcoming study, they were answered completely and to my satisfaction.

I agree to the described collecting and processing of behavioral responses and information about musical expertise and hearing abilities. The recording and processing of these data are carried out in pseudonymized form by means of a code and do not contain my name. There is a coding list on paper that links my name to this number. The investigators are the only persons who have access to this coding list and who are thus able to link the collected data to my name. After completion of the research project, the coding list will be destroyed. From this point on, my data are anonymous, which means that they cannot be linked to my person any longer.

I understand that I am free to withdraw my consent to the collection and storage of my personal data without negative consequences. I have been informed that I may request deletion of all my data at any time. However, if the coding list has already been destroyed, it will no longer be possible to identify and thus to delete my data set.

I understand that at the end of the study or when the results are published, the anonymized data will be made available to the broader scientific community, either via a secure Internet-based repository, or by request from other researchers. This study follows the recommendations of the German Research Foundation (DFG) and the German Society of Psychology (DGPs) on the handling of research data. The purpose, nature and extent of any subsequent use of this data cannot be predicted at this time.

The participant information sheet about the examination is part of this consent form. I have received a copy of the participant information sheet and of the consent form.

If I have questions or other requests, I can contact the following persons:
